

PHP ASSIGNMENT NR. 1

ASSIGNMENTS

Install and setup your system.

Create a PHP document that uses 3 variables to output:

"I am a PHP document," "but you can't see my code."

"Thanks for watching!"

Create a PHP document that uses 2 variables to calculate an output:

`$var1 = 21`

`$var2 = 45`

You need to: Add, Subtract, Multiply and Divide the variables.

What is the string length of:

"Hello, welcome to my world!"

Where in the string is "to" located:

"Hello, welcome to my world!"

Set up a if...else and a if...elseif....else statement, that:

Checks if \$num is greater than 13

else if \$num is greater than 10

else \$num is less than 13 and 10

Make sure to read all the information from this lesson and the next on w3schools, and the first chapter in the book until next time.

Look at the document "Restaurants.pdf", for inspiration, and choose your theme for your restaurant webpage, until next time.
