

PHP ASSIGNMENT NR. 3

Setup your test database in PHPMyAdmin, or use the create database, table etc.

DB-name: test

Table-name: names

The structure should be:

ID	fname	lname	age
INT (Primary key, not NULL, Auto Increment)	VARCHAR(50)	VARCHAR(50)	INT(3)

Write a connection script.

When the database and the connection script are done, insert some names into the table.

Now manipulate the data in the database.

Write at least a script that:

- Deletes an entry
- Creates a entry's via a form
- Updates an entry
- Displays all current entry's
